

On 27 September, our First Secretary and Consul, Melinda Rio, spoke with students from four elementary schools in the Zvezdara municipality. Students heard about the Australian way of life, the unique environment and experienced their first taste of Vegemite. Students already knew many things about Australian animals and Aboriginal mythology, and showed high enthusiasm with lots of questions.

The event, organised by Zvezdara municipality was held at “Branko Miljkovic” municipal library, is part of an initiative called ‘I travel and learn the sole of our planet’, which is designed to give Serbian students a sense of the life and diverse cultures of other countries. The municipality is planning future events with other embassies to share their experiences about their countries.
